

## Practice Management and EMR Solutions

Each medical practice has unique needs and distinct requirements. The clinical notes, data collection, internal processes, etc., can vary across medical practices and across medical specialties. Hence, it would be beneficial for a medical practice to invest in a customized practice management / EMR system for their practice and medical specialty.

NewCreationIT can custom design and implement an EMR solution that fits exactly to your medical practice and medical specialty (or specialties, for multi-specialty centers). While most EMR systems are unquestionably expensive, NewCreationIT leverages its offshore software development center to deliver cost effective customized solutions for your practice. You will be surprised!

Some of the main features that will be designed and developed include:

- Patient Registration
- Patient Scheduling
- Practice Management : Administration, Personnel file, Incident Reports
- Billing : Transaction Records, Payment Entries, Claims Processing, Reports
- Integration : Credit card payments, e-Prescriptions, Voice Recognition Systems, eFax
- EMR/Clinical Notes
- Standards Compliance : HIPAA, HL7

Making this investment may soon become mandatory with pay-for-performance on its way. A practice management / EMR system can make it easier to document quality care that is delivered efficiently.

NewCreationIT is a leading provider of technology solutions that transform both the clinical and financial aspects of healthcare delivery. NewCreationIT leverages its software development center in Bangalore, India to deliver world-class, custom solutions for medical practices, at amazingly low costs.
